

VROOM FOR IMPROVEMENT

LET'S SAY YOU NEED TO GET TO LAX, don't want to drive, and are concerned about the environment. You can meet all three conditions by calling Econation, LA's newest and greenest alternative-fuel-based chauffeured-car service. With Econation you won't just save on parking fees, you'll be helping to reduce CO2 emissions.

Econation was founded with a goal of accelerating acceptance of alternative-fuel transportation, and on top of that, exceeding consumer expectations. Clients are treated to the latest in eco-friendly vehicles, technically advanced amenities, and comfortable rides.

The company's all-new fleet (which started with 25 vehicles and is expected to number around 80 by year's end) is certainly the greenest around. With a selection that includes Toyota Prius hybrids, alternative-fuel-based Executive L Series Lincoln Town Cars, and GM Yukon and Tahoe hybrid utility vehicles as well as shuttle buses that run on alternate fuels, Econation offers a variety of transport options, and not only for the Los Angeles and Orange County areas, but also in Northern California and New York.

All vehicles are black with tinted glass and leather interiors that feature digital audio/video entertainment and optional wireless Internet. They're also

stocked with healthy refreshments.

So do your bit to save the environment by leaving the gas-guzzler at home and letting Econation drive you in comfort. *Visit econation.com.*
